

MANIKANDAN KANNAN

Lead Data Engineer | Snowflake | AWS | Python | SQL
| Airflow | ETL/ELT

+91 80980 47039 mani.manikandank75@gmail.com www.linkedin.com/in/manikandan-kannan/ Hosur, Tamilnadu - 635115

Skills

ETL & Data Integration:

- Pentaho
- Airflow
- AWS Glue

Programming & Querying:

- Python
- SQL

Data Warehousing & Storage:

- Snowflake
- AWS S3
- ClickHouse
- MongoDB
- PostgreSQL
- SQL Server

Data Querying & Analytics:

- AWS Athena
- OpenDataSoft

Data Visualization & Business Intelligence (BI):

- Power BI
- AWS Quicksight
- Apache Superset
- Grafana
- Sisense
- Streamlit

AI & Notebooks:

- AskAI
- NotebookLM

Project Management Tools:

- JIRA Atlassian
- Zentao

Professional Summary

Lead Data Engineer with 9+ years of experience designing and delivering scalable data pipelines, ETL/ELT solutions, cloud data platforms, data warehouses, and business intelligence solutions. Strong hands-on expertise in Snowflake, AWS, Python, SQL, Airflow, AWS Glue, data migration, pipeline automation, and real-time data processing.

Professional Experience

Lead Data Engineer

May 2017 - Present

Datanow Solutions LLP

Oil & Gas Projects:

Delivered end-to-end technical solutions and support to clients including Utah Gas, Chaco, ARB, Petrox, Anschutz, and Encore, with a focus on data analytics, processing, reporting, and pipeline automation.

Roles & Responsibilities:

- Extensive experience in Snowflake development, including designing warehouses, schemas, tasks, and stored procedures for efficient data management.
- Skilled in data migration within Snowflake, utilizing stages, file formats, data transformations, and implementing robust error handling.
- Hands-on expertise in using Streamlit to build interactive applications integrated with Snowflake.
- Led a 24/7 support team, ensuring continuous service delivery and rapid issue resolution.
- Conducted interviews and successfully hired data engineers and support team employees to strengthen the team.
- Trained and mentored team members to enhance performance and operational efficiency.
- Managed and resolved SCADA-related tasks, ensuring system integrity and minimal downtime.
- Developed and delivered business intelligence reports that provided actionable insights for clients.
- Designed and implemented a dashboard for real-time streaming data monitoring, preventing system outages.
- Created a customer-facing dashboard that resulted in 100% customer satisfaction through interactive features and usability.

Education

Master of Computer Applications
PMC Tech, Hosur | Anna University,
Chennai | 2014

B.sc Software Engineering
PMC Tech, Hosur | Anna University,
Chennai | 2011

Higher Secondary – Maths & Biology | Govt. Hr. Sec. School,
Samalpallam | 2008

Language

English	★★★★★
Tamil	★★★★★
Telugu	★★★★☆

- Collaborated with clients in meetings to gather requirements and successfully implement tailored solutions.
- Developed and implemented an incident management plan, ensuring rapid resolution of critical issues within the organization.

Project: Saint-Gobain Rail (Train Tracking System)

Designed and managed an automated ETL pipeline for real-time train tracking, optimizing logistics operations.

Roles & Responsibilities:

- Collaborated directly with client stakeholders to gather requirements and translate operational needs into production data solutions.
- Analyzed data and developed comprehensive audit reports using sample datasets to assess data quality; sourced critical data from diverse sources.
- Designed and automated an end-to-end ETL pipeline to ingest, transform, validate, and store real-time train tracking data in MongoDB.

Data Analyst

Jul 2016 - Apr 2017

Six Star Technologies

Project: Interview IA (Interview Platform)

Specialized in data analytics, reporting, and pipeline automation to optimize platform efficiency.

Roles & Responsibilities:

- Designed ETL pipelines to ingest, transform, and store application data in PostgreSQL.
- Integrated REST API data sources with the interview platform.
- Developed BI reports and dashboards to provide actionable customer insights.
- Built Pentaho ETL workflows for automated data integration and transformation.
- Gathered and validated external datasets using web data extraction tools including Mozenda.

Selected Project Portfolio

Oil & Gas Data Platform

Snowflake | AWS | Python | Airflow | Streamlit

Built data pipelines, migrations, and real-time dashboards for multiple energy clients, supporting reliable analytics and incident response.

Saint-Gobain Rail - Train Tracking System

ETL | MongoDB | Real-time Data Processing

Automated ingestion, transformation, validation, and storage of tracking data, with audit reporting aligned to stakeholder requirements.

Interview IA - Analytics Platform

Pentaho | PostgreSQL | REST APIs | Business Intelligence

Created ETL and API integrations plus dashboards for actionable insights.
